

Midterm Project – *5 element points and the 5 flows*

- Compare the “5 element points” – compare all of the earth points, what qualities do they have in common. What makes a point an earth point even when it belongs to a meridian of a different element. What are earth points used for? Do this for all of the elements.
- Compare the “5 flow points” - compare all of the well points, what qualities do they have in common. What makes a point a well point? What are well points used for? Do this for all of the flows.
- You should use at least 3 references which may include online resources such as yinyanghouse.com as well as books such as the shiatsu text, tappins text, etc.
- Project may be completed in essay or chart format.
- No print-outs of other people's work will be accepted! All work must be original, in your own words, and it must be well researched and cited. For hints on how this is done please visit:
